

Session on blockchain adoption

One of the leading blockchain adoption start up Tezos took hold of a session on 23rd November at ABESIT Ghaziabad (DS lab) which revolved around blockchain and its implementation to solve real life problems It was really rewarding to all our web3 enthusiasts and had been really successful as 70+ students attended it. The session was really insightful as students were taught all about blockchain, its types, regarding Solana's pos and students too experienced practical implementation by building smart contract on smart pie using python. Lastly the session ended with a fun quiz along with some great giveaways🎉. Our students also learnt about How this technology can become a revolution in medical and security domain?

The speakers Ojaswi (smart contract developer) and Simarpreet Singh (Developer Advocate) were really interactive and supportive during the whole session.
